

The Irrigation Division of The Bruce Company grew from the need for quality control and project coordination on our landscape projects.

The Bruce Company installs and services both residential and commercial landscape irrigation systems. Our goal is to design and install efficient irrigation systems that conserve water by applying just the right amount of water to supplement natural rainfall. Your lawn and plantings will thrive from a system installed in harmony with landscape construction.

DESIGN & INSTALLATION:

The Bruce Company is an Irrigation Association Certified Irrigation Contractor and Designer.

- Computer Aided Design (CAD), Specifications and Estimating are available
- We install commercial grade materials manufactured by Toro, Hunter, Rain Bird and Netifim
- Many systems are installed using our vibratory plow, which eliminates trenching
- We can renovate your old irrigation system and improve its performance by updating sprinkler heads and controllers.

MAINTENANCE:

Our competent, qualified and dependable employees repair all brands and types of irrigation systems. Our services include:

- Spring start-up
- Fall winterization
- Programming and auditing system performance
- Wire and line locating
